BOOK

Grades 2nd - 3rd

A bicycle is not a toy...
It's a vehicle!

To be a smart bike rider you need to follow the rules of the road. That is why it is important that you go over the list below with your parents to make sure your bike keeps to NJ bike law

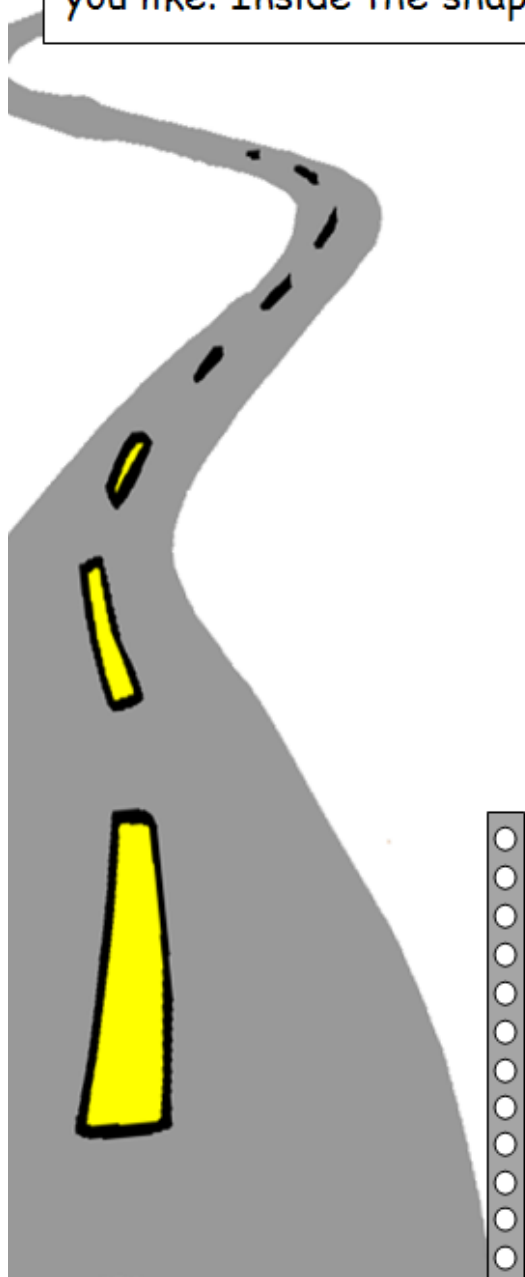

- A white headlight & red tail light**
- A rear red reflector**
- A bell or audible device**
- Brakes that can make wheels skid**

Kids under 17 must wear a helmet!

REMEMBER parents may be held responsible for the child's violation of any traffic law!

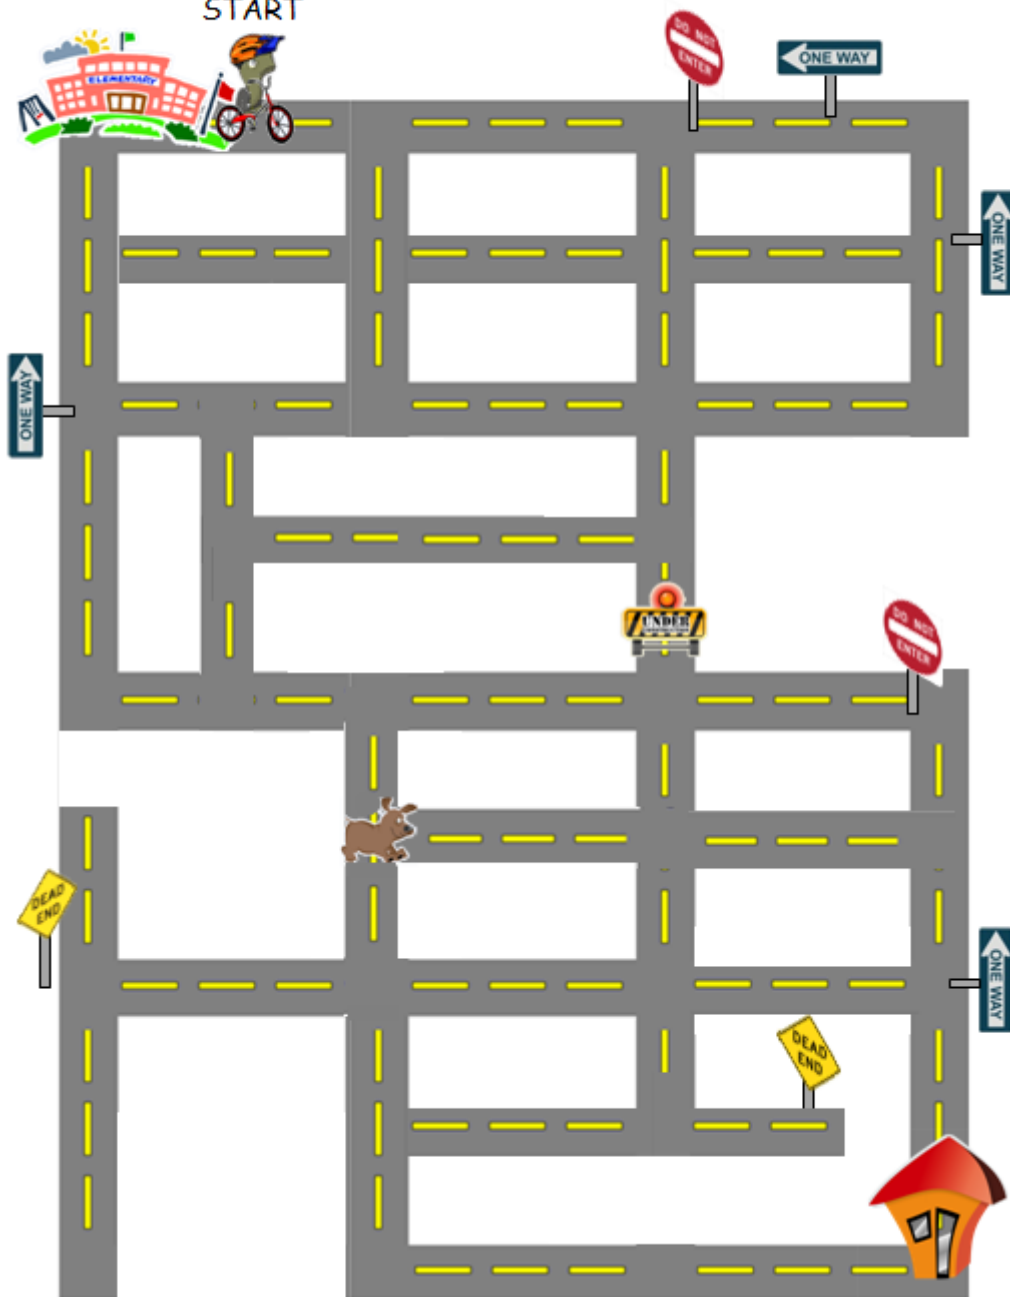

Now imagine you are in charge of making road signs. What sign would you make?

In the space above the post draw any shape you like. Inside the shape draw your sign.

Help Tommy find his way home from school but be sure to obey the traffic signs!

START

FINISH

First and most important rule to being a smart rider is to make sure your helmet fits correctly. Below, circle the helmet that fits best, then describe why in the space below.

Color the traffic signal using the correct colors seen on the road.

On the right describe what you should do when you see them.

Help Tommy identify each sign, then in the space below the sign write what the sign means and what you should do each time you approach one on your bike.
